

NEW MODEL PRESS RELEASE

2026 KAWASAKI TERYX KRX® 1000 AND TERYX® KRX4™ 1000 SPORT SIDE X SIDE LINEUP **DOMINATE ADVENTURE**

For 2026, Kawasaki proudly unveils its latest iteration of the Teryx KRX® 1000 and Teryx® KRX4™ 1000 sport side x side lineup. Building upon its legacy, the 2026 models emerge stronger than ever, offering enthusiasts an array of thrilling options to ensure they are ready to take on any adventure.

Leading the charge are the Teryx KRX® 1000 Blackout Edition and Teryx® KRX4™ 1000 Blackout Edition side x sides, tailored for thrill-seekers who crave nighttime excitement in the desert or on the trail. Boasting sleek all-black interior and exterior designs, these models come equipped with LED light bars, an integrated audio system to keep the trail vibes alive, sturdy front and rear bumpers, and a winch, ensuring an unforgettable experience under the stars.

Engineered to absorb obstacles, the standard Teryx KRX 1000 and Teryx KRX4 1000 models have been updated for 2026 with SHOWA piggyback shock absorbers that provide unprecedented cabin comfort ensuring a smooth and enjoyable ride for drivers and passengers across a variety of terrains.

These class-leading machines are built around a highly dependable 999cc parallel-twin engine that is paired with a CVT transmission and built on a highly rigid frame with an integrated Roll Over Protection Structure (ROPS). The two-seater Teryx KRX 1000 is available in five different trim packages, while the four-seater Teryx KRX4 1000 can be found in five different trim packages, ensuring that there is something suitable for everyone out on the trails.

KAWASAKI TERYX KRX® 1000 Blackout Edition

The two-seater Teryx KRX 1000 Blackout Edition isn't just about style; it's packed with an array of features designed to enhance both performance and convenience on every desert adventure. Equipped with a high-grade Hifonics audio system, drivers can now add a soundtrack to their off-road excursions, amplifying the thrill of the ride. Complete with two 6.5" door speakers and a 12" subwoofer behind the seats, it offers excellent sound that can be heard and felt. The compact studio unit has a Bluetooth®/AM/FM/ 600-watt 5-channel stereo built into the center console, giving the dash a well-integrated appearance.

Furthermore, this model comes standard with a KQR™ premium roof, shielding passengers from the elements and ensuring comfort throughout the journey. Steel bumpers, both at the front and rear, not only contribute to the vehicle's rugged appearance but also offer additional protection for the

vehicle, providing peace of mind on challenging trails. The bumpers are textured in black powder coating.

One standout feature of the Teryx KRX 1000 Blackout Edition is the advanced lighting system, which boasts a 38" K-Glow LED light bar mounted on the front roof with four flood light reflectors and 24 spot beam reflectors for a total of 28 LED lights. Two light settings allow users the option of a green glow for added style or a full light bar function. An 8" K-Glow LED light bar mounted to the front bumper provides additional front lighting. The 8" light bar features four flood light reflectors and two spot beam reflectors for a total of six LED lights. It also offers the same two light settings as found on the 38" light bar. On the rear, two 8" K-Glow LED light bars are mounted to the roof and add more illumination.

Additionally, the inclusion of premium components, such as the handy WARN® VRX 45 Powersport winch, further elevates the model's functionality. The winch consists of 50' of durable, aircraft-grade ¼" steel rope and has a 4,500 lb. capacity. With market-leading performance and features, the Teryx KRX 1000 Blackout Edition is not just a vehicle: it's a versatile night-adventure companion, ready to conquer the desert with style and confidence.

KAWASAKI TERYX KRX® 1000 ES

The Teryx KRX® 1000 eS is built from the ground up to be the ultimate sport side x side. Featuring similar DNA to the Teryx KRX1000, the eS model comes equipped with Kawasaki Electronic Control Suspension (KECS) featuring FOX® 2.5 Live Valve Internal Bypass shocks. The KECS suspension technology communicates with the Bosch electronic control system and utilizes Kawasaki's proprietary suspension settings to deliver greater comfort and enhanced stability across a wider range of riding situations. FOX's Internal Bypass damping architecture features position-sensitive damping that changes depending on the operating zone of the suspension stroke to deliver a push and predictable ride. In addition to the electronic suspension, the Teryx KRX 1000 eS features upgraded components like a seven-inch high-grade TFT color instrumentation that offers three different selectable brightness levels, KQR™ sport roof to shelter passengers from harsh weather and sun, an aggressive front bumper that is powder coated to match other styling components, and specially designed color and graphics.

The four-seater Teryx KRX4 1000 Blackout Edition comes with all of the same great features and styling cues as its two-seater counterpart. This impressive list of features includes a high-grade Hifonics audio system; a WARN® VRX 45 Powersport winch; and an advanced lighting system, boasting a 38" K-Glow roof-mounted LED light bar along with an 8" K-Glow front-bumper mounted LED Light bar and two 8" K-Glow LED rear-facing light bars mounted to the roof for further illumination.

The 2026 Teryx KRX4 1000 Blackout Edition is offered with reflective black decals and all its components from the ROPS, A-arms, suspension coils, wheels, and seats are finished in black for a stealth look.

The four-seater Kawasaki Teryx® KRX4™ 1000 sport side-by-side is the ultimate companion for groups seeking high-adrenaline adventures and looking to tackle tough terrains. Its robust 999cc parallel-twin engine, paired with a CVT transmission and centrifugal clutch, delivers unmatched power and torque, making light work of whooped-out trails and technical rock crawling sections. With on-the-fly electronically selectable 4WD and front differential lock, as well as two power modes (Full and Low), drivers can tailor the power delivery to suit their preference and prevailing conditions.

June 10, 2025

Designed for uncompromising performance, the Teryx KRX4 1000 features a high-rigidity frame with an integrated Roll Over Protection Structure (ROPS), positioning the wheels for maximum stability, superb cornering, and straight-line confidence. Showa piggyback shock absorbers, along with long suspension arms, offer the longest suspension travel in its class, ensuring premium cabin comfort even over the roughest terrain.

Equipped with large 31-inch MAXXIS Carnivore tires and 15-inch aluminum wheels, the Teryx KRX4 1000 navigates obstacles with greater ease, providing unmatched traction and control in off-road riding situations. The Teryx KRX4 1000 lineup cabin provides generous space, featuring four high-backed bucket seats equipped with three-point seatbelts for optimal support. Each seat offers ample legroom, complemented by lever-adjustable front seats allowing a total forward-rearward range of 6 inches. For convenience, five cup holders are strategically placed: two in the center console between the front seats, one in the front passenger door, and two in the center console between the rear seats. Additionally, the spacious rear carrier area accommodates up to a 32-inch spare tire and boasts a load capacity of 350 pounds. A large all-digital instrumentation screen provides vital information at a glance, including CVT temperature readout and low voltage-warning lamp.

The four-passenger Teryx® KRX4™ 1000 eS features DNA similar to that found on the two-passenger Teryx KRX 1000 eS with a durable 999cc parallel-twin engine that is paired with a CVT transmission and centrifugal clutch. It features an on-the-fly electronically selectable 4WD and front differential lock as well as two power modes (Full and Low) that allow the driver to set power delivery to suit preference and conditions. A high-rigidity frame with integrated Roll Over Protection Structure (ROPS) positions the wheels as far apart as possible to provide the stability needed while out on the trails. Kawasaki Electronic Control Suspension (KECS) paired with FOX® 2.5 Live Valve Internal Bypass shocks deliver a comfortable and capable ride in a wide range of riding conditions. Thanks to the large design of the cabin, the rear allows for a full-sized adult to sit comfortably in the rear seats. Large 31-inch MAXXIS Carnivore tires were selected to handle obstacles with ease. The cabin of the Teryx KRX4 1000 lineup offers plenty of room with four high-backed bucket seats and three-point seatbelts that support the driver and passengers during riding. All four seats offer ample legroom and are complemented by lever-adjustable driver and passenger seats in the front with a total forward-rearward range of 6-inches. A total of five cup holders offers plenty of storage places for drinks on the trail with two located in the center console between the front seats, one in the front passenger door and two in the center console between the rear seats. The roomy, rear carrier space is large enough to accommodate up to a 32-inch spare tire and has a load capacity of 350 pounds.

ABOUT KAWASAKI

Kawasaki started full-scale production of motorcycles over a half century ago. The first Kawasaki motorcycle engine was designed based on technical know-how garnered from the development and production of aircraft engines, and Kawasaki's entry into the motorcycle industry was driven by the company's constant effort to develop new technologies. Numerous new Kawasaki models introduced over the years have helped shape the market, and in the process have created enduring legends based
