The KLX230R is a beloved favorite among off-road enthusiasts, promising endless fun across diverse terrains, whether navigating woodland trails or taking on desert landscapes. At the heart of this trail-blazing machine lies the fuel-injected 233cc air-cooled 4-stroke single engine, meticulously engineered to deliver a perfect balance of power and torque, finely tuned for the low-mid range. A purpose-built high-tensile steel perimeter frame delivers unwavering stability on the trails and is held up by a long-travel 37mm telescopic front fork and New Uni® rear suspension that offer 9.8" of wheel travel front and rear. The KLX230R comes equipped with full-size 21" front and 18" rear wheels for efficient trail navigation, while a 240mm front brake and 220mm rear brake provide excellent stopping power. The KLX230R exudes the essence of a capable off-road machine thanks to its KX-inspired styling.

The KLX230R S is built off the same proven platform and offers riders a reduced reach to the ground with a 34.4" seat height, noticeably lower than the 35.6" seat height found on the standard model. Additionally, the front wheel travel has been reduced to 8.7" on the front and 8.8" on the rear, improving confidence in both shorter and beginner riders.

The KLX140R motorcycle is available in three model variations, each promising an off-road adventure packed with unforgettable moments. Powered by a robust 144cc, air-cooled, single-cylinder engine, featuring an electric starter and keyless ignition, the KLX140R line of motorcycles deliver reliable performance. The broad, smooth, high-revving 144cc engine, paired with a manual clutch and five-speed transmission, ensures an efficient and user-friendly riding experience. While the standard KLX140R sports a 17" front and 14" rear wheel, the mid-sized KLX140R L offers taller riders enhanced ground clearance with 19" front and 16" rear wheels. The KLX140R F is equipped with full-size off-road wheels and tires—a 21" front and 18" rear—for uncompromising off-road capability.

The KLX110R comes in two variations, offering an excellent entry package for new riders eager to explore off-road. Built with a high-tensile steel frame, 30mm telescopic fork, and a single rear shock, the KLX110R ensures effortless handling and lasting durability. Featuring an automatic centrifugal clutch system, the KLX110R simplifies take-offs and gear shifts, enabling riders to focus on the terrain while maximizing the potential of the 112cc single-cylinder, four-stroke engine. For those seeking a taller stance and enhanced capabilities, the KLX110R L model offers a taller seat height (28.7" compared to 26.8" for the KLX110R), increased suspension travel, an extra 1.9" of ground clearance, and a four-speed transmission with a manual clutch.
