

NEW 2027 KAWASAKI NAV® 2+2 PTV

NAV THE NEIGHBORHOOD: SPORTY AND COMPACT WITH 2+2 SEATING

A quick trip through the gated community to a friend's house. Taking the path to and from school with three friends along for the ride. Stopping by the park to hang out. Maneuvering in tight spaces. The new NAV® 2+2 feels familiar, like your favorite piece of outdoor gear, helping you get where you're going with minimal fuss. Kawasaki's NAV® PTV series began with the NAV® 4e PTV in 2025, a model that blended ease and convenience with a high-quality lifted look, premium feel, and strong curb appeal. It established itself as a stylish and practical way to carry a family of four while offering a distinctive alternative to conventional golf carts.

The NAV 2+2 builds on this success with a more compact package made possible by its 2-forward +2-rearward seating arrangement. Its shorter wheelbase and tighter turning radius make tight maneuvers, such as negotiating narrow designated cart paths highly manageable. Retained from the NAV 4e is the lifted look, with large off-road-style wheels and tires, along with a distinctive front end inspired by Kawasaki's side x side models. Together, these elements give the NAV 2+2 strong on-road presence and a premium appearance that is sure to attract attention around the neighborhood.

Powered by an internal combustion engine, the NAV 2+2 offers compact styling with a dynamic character and agile handling, building on an already successful platform to create a vehicle that is convenient to use while retaining strong visual appeal. Compact and agile, the new NAV 2+2 is designed to make everyday transportation simple and convenient.

NAV® 2+2 KEY FEATURES

- 401cc 4-Stroke Fuel-Injected Air-Cooled Engine
- Continuously Variable Transmission (CVT) For Smooth Operation
- Rugged Chassis Design With Strong Steel Ladder Frame And Short Wheelbase
- Premium, Compact Lifted Styling
- All-LED Lighting With Unique Front-End Design
- Comfortable Seating (2 Forward, 2 Rear-Facing) W/ Fold-Flat Rear Seat
- Functional & Spacious Front & Rear Storage
- 14-in Wheels With 23-in Off-Road Style Tires
- 6-Gallon Long-Range Fuel Tank
- Premium 3D Kawasaki Emblem

POWER UNIT

The NAV 2+2 features an internal combustion engine that delivers smooth acceleration and familiar operation, making it well suited to neighborhood transportation. Powered by a compact and lightweight 401 cc, 4-stroke, OHV, air-cooled engine, it offers a smooth, approachable character and extended operating range. Producing 11.7 hp at 3,800 rpm and 18.4 lb-ft of torque at 2,200 rpm, the engine delivers ample power to reach and maintain a maximum speed of 19 mph.

A mid-engine layout positions the engine ahead of the rear axle, contributing to excellent occupant space and a composed ride character. Efficient overhead valves and fuel injection contribute to quiet, smooth operation, while instantaneous fuel delivery provides a connected feeling between the accelerator pedal and power delivery for easier low-speed control and maneuvering. The fuel injection system uses a 24 mm throttle body and automatically meters fuel based on engine temperature, throttle position, and engine rpm. A 6.0-gallon fuel tank offers plenty of range on a single fill-up, while an idling stop function helps conserve fuel and reduce emissions.

The NAV 2+2 features a high-capacity 12V battery (40 Ah) to support frequent stop-and-go use. The engine is located under the front seat, which flips up for easy maintenance access, while the fuel filler is conveniently positioned on the right side of the body ahead of the right rear tire.

A belt-driven automatic transmission provides smooth, intuitive operation. Its settings keep the engine primarily in the low-to-mid rpm range for quiet, predictable performance, while appropriate downshifts during re-acceleration help maintain smooth response. To start the engine, the ignition switch must be in the ON position and the shift lever beneath the front seat in either the Forward or Reverse position, then press the accelerator pedal. The engine will not start while the shift lever is in Neutral.

CHASSIS

Short Steel Ladder Frame for Durability and Ride Comfort

Inspired by Kawasaki's side x side frames, the steel frame of the NAV 2+2 is tough and durable while also being designed to provide a comfortable ride. The specifically developed frame uses a short wheelbase to provide excellent maneuverability while maintaining a compact overall size.

A ladder-type construction and square tubes made from high-quality steel, developed based on feedback from Kawasaki Side x Sides, contribute to a robust structure and stable handling characteristics for excellent ride comfort. The short 67.5-inch wheelbase contributes to an 11.2-foot minimum turning radius, facilitating tight U-turns and smooth maneuvering into and out of narrow exits on designated cart paths.

An elevated seating position is another strength of the NAV 2+2, providing the driver and passenger with an enhanced vantage point for improved visibility, added comfort and peace of mind. With 7.1 inches of ground clearance, the NAV 2+2 balances style with the ability to overcome bumps. Side steps available as accessories further facilitate getting in and out with the raised floor.

The NAV 2+2 features a roof as standard, helping keep passengers out of the elements while contributing to a relaxing ride. The roof is shaped to help prevent water from collecting on top, while its rigid design prevents rattling while driving and maintains ample head clearance for all occupants.

Comfortable Suspension, Steering Mechanism

Independent MacPherson struts, as used in Kawasaki's off-road side x side models, feature optimized settings for the NAV 2+2. Their strong shock absorption contributes to ride comfort and provides passengers with a smooth, comfortable ride. Conventional swing-axle rear suspension, consisting of a shock unit with leaf springs, contributes to ride comfort and predictable handling. Model-specific steering geometry contributes to light steering effort and enhanced maneuverability on the NAV 2+2.

Off-Road Style Wheels, Tires and Rear Brakes

Fourteen-inch off-road-style wheels combined with 23-inch tires accentuate the lifted style of the NAV 2+2. The tires have an off-road-inspired look while also producing low road noise for a sophisticated, quiet ride. The parking brake is activated by pressing the top portion of the two-piece brake pedal, offering plenty of stopping power.

Convenient Storage

Under the front hood is a 6.1-gallon storage compartment with a 10-lb. capacity, making it easy to bring items along while keeping them protected from the elements. Storage compartments in the dashboard provide convenient places to keep items within arm's reach. A 0.53-gallon compartment on the left offers quick access, while a 1.06-gallon center compartment features a closable lid. A 1.59-gallon lockable glove box on the right includes a USB outlet and can be locked or unlocked with the ignition key for added security.

A 9.25-gallon storage compartment in the rear provides additional cargo space with a 35-lb. capacity. The Fold-Flat Seat allows the rear seat cushion to fold forward, creating a flat cargo area for carrying larger items and adding versatility.

When used with the accessory Cargo Barrier, the flat cargo area measures 32.7 inches x 40.6 inches and supports up to 300 lbs., providing the largest cargo area in its category. The cargo area also features slots for KQR mounts, facilitating the use of a variety of Genuine Accessories. When not in use, KQR mounts can be conveniently stored in slots built into the rear carrier. Anti-slip grooves in the cargo surface help keep multiple five-gallon buckets securely in place.

Premium Sporty & Active Exterior

A lifted style was key to designing the exterior of the NAV 2+2, with a styling concept of "premium, sporty & active." Inspired by Kawasaki's side x sides rather than conventional golf carts, the NAV 2+2 has a unique appearance. Its short, compact shape visually reinforces its role as a personal mobility vehicle while emphasizing the appeal of its layout, including convenient entry and exit and enhanced maneuverability.

The side covers on either side of the front grille are color-matched to the gray interior panels, contributing to a compact, condensed look and highlighting the sporty, functional nature of the NAV 2+2. A premium-looking 3D Kawasaki emblem clearly identifies it as a Kawasaki model.

The LED headlights feature an aggressive shape with blacked-out internals that contribute to a premium, sporty and active appearance. Projector lamps provide effective illumination, while each headlight unit includes high beam, low beam, position lamp and turn signal. Self-canceling turn signals

are integrated into the headlights for a premium, uncluttered front-end look, and hazard lights are also included.

Front fenders and the panels above them are made of black plastic for a functional appearance and sit high above the front wheels, adding to the lifted-style design. The roof features a compact, integrated appearance with a rounded shape that tapers toward the rear, emphasizing the sporty looks and personal mobility character of the NAV 2+2. Its unique shape also highlights the appeal of the layout and contributes to its approachable, fun-to-drive nature.

Side panels are produced through a vacuum-forming process, resulting in a shape with no sharp corners that tapers from front to rear and wraps around the inside of the rear fenders. This helps emphasize the rear fenders and contributes to a condensed, compact and dynamic appearance. The contrast between the body-colored side panels and black rear fenders highlights the rear tires and wheels, contributing to a more planted appearance.

The LED taillights also function as brake lights and are positioned to remain visible when the rear step is being used. The rear step tapers inward to create a more compact appearance and make the overall vehicle appear shorter, further enhancing the sporty, personal-mobility character. Slim, simple-spoke wheels feature an off-road design that contributes to the vehicle's rugged styling.

The NAV 2+2 is available in a distinctive Neon Yellow colorway designed to maximize visual recognition, enhance visual appeal and increase visibility, as well as a Crystal White colorway for a more subtle appearance.

Premium Comfortable Interior

Featuring stylish seats with ample cushioning and thoughtfully designed storage compartments, including a lockable glove box, the well-appointed interior of the NAV 2+2 provides convenient places for passengers to store their belongings and charge their devices while enjoying a comfortable ride.

The seats feature soft urethane for a comfortable feel. The seat covering is folded back and stitched, increasing the number of layers at the seat edges and creating a more defined silhouette for a premium appearance. The use of the same material throughout also contributes to the casual yet tough image of the NAV 2+2. The all-black seats help make dirt and stains less noticeable while contributing to a clean, understated appearance. Their positioning provides ample head clearance for the driver and passengers, while their shape and location facilitate easy entry and exit.

The D-shaped steering wheel on the NAV 2+2 has a unique, modern shape that offers an ergonomic grip and ample leg clearance. The steering column is fully covered for a refined look and feel. In addition to the horn, the steering column features a turn-signal lever with an integrated headlight switch and hazard-light switch. A shift lever positioned below the front seat is used to select the desired gear (F/N/R). A key switch on the steering column accepts the vehicle-specific key, making starting the NAV 2+2 convenient and intuitive.

Behind the steering wheel is a full-color TFT instrument panel with a 1.5-inch display. The meter displays pertinent information, including the forward/reverse/neutral indicator, hour meter, fuel level and turn-signal indicator. Opening and closing display featuring the Kawasaki logo when the NAV 2+2 is powered on and off add to the premium experience.

An automotive-inspired dashboard adds to the premium look and feel. The predominantly black dashboard and center console are accented with strategically positioned gray-tone panels featuring the same textured surface finish as the fenders. On the Neon Yellow NAV 2+2, the dashboard also includes color-matched highlights. Design elements inspired by Kawasaki's side x side models contribute to a rugged, active image.

Four front cup holders can accommodate 30-ounce tumblers or 16.9-ounce plastic bottles. Two additional rear cup holders are available as accessories and attach to the rear footrest grab bar, bringing the total to six cup holders.

The seat grips are made from glass-reinforced fiber that balances grip and strength. Their rounded shape has no sharp corners, helping minimize arm fatigue while on the move. The front seat grips are attached to the seat bottom rather than the frame, allowing them to be flipped up for easy maintenance access.

A rearview mirror attached to the roof support structure allows the driver to view the surroundings, while side mirrors are available as Genuine Accessories. Grab bars built into the roof support structure provide convenient handholds for passengers, including those seated in the rear seats.

Rubber mats cover the entire floor to provide enhanced grip. The footwell design maximizes open space around the side fenders and floor, providing ample foot room for exceptional comfort for the driver and front passenger.

Comfortable Rear-Facing Seats & Rear Step

The rear-facing seats feature the same level of cushioning, support and snag resistance as the front seats, helping ensure rear passengers enjoy a comfortable ride. A rear step extending from the back of the NAV 2+2 provides a comfortable place for rear passengers to rest their feet. Designed to sit low and provide ample floor space, the step also features an anti-slip pattern to facilitate entry and exit. Kawasaki specially engineered the connection between the body and step to help prevent mud and debris from entering the step area. Ample clearance between the rear seat and grab bar, as well as between the rear seat and roof, contributes to smooth and convenient entry and exit for rear passengers.

Customize the NAV® 2+2 for the Course and Beyond

The Kawasaki NAV® 2+2 can be tailored for added comfort, convenience, protection and versatility with a wide range of Kawasaki accessories designed to complement the vehicle.

For added comfort and everyday usability, Side Steps provide a lower step-in height for front passengers, while the Polycarbonate Windshield can be quickly opened or closed to balance wind protection and cabin ventilation. A Sun Visor helps reduce glare, and the adjustable Side Mirror Set expands the driver's field of view. For changing weather conditions, the Premium Soft Enclosure adds another level of protection for front and rear passengers.

Storage options make it easy to bring along gear for the day. Soft Overhead Storage adds convenient zippered compartments above the cabin, while Center Storage Bags fit between the front and rear seat backs. A Rear Storage Net helps secure additional items, and the Soft Cooler fits in the

rear compartment and holds up to 24 cans. When the vehicle is parked between adventures, a lightweight, UV-resistant Storage Cover helps provide added protection.

For additional utility, the KQR™ Cargo Barrier adds functionality to the carrier bed with cargo-retaining rails and integrated tie-down points. LED Pod Lights can provide additional illumination at the front of the vehicle or around the cargo area, while the steel Brush Guard adds rugged front-end protection without interfering with headlight performance.

The NAV® 2+2 can also be equipped specifically for a day on the golf course. The KQR™ Multifunction Rack can carry two golf bags or a 20-quart cooler and serves as the foundation for additional golf-focused accessories. An available Ball/Club Washer helps keep equipment clean throughout the round, while the Sand Bottle provides a convenient way to carry sand for divot repair. Together, these accessories transform the NAV® 2+2 into a versatile vehicle equally suited for recreation, transportation and a day on the course.

ABOUT KAWASAKI

Kawasaki started full-scale production of motorcycles over a half century ago. The first Kawasaki motorcycle engine was designed based on technical know-how garnered from the development and production of aircraft engines, and Kawasaki's entry into the motorcycle industry was driven by the company's constant effort to develop new technologies. Numerous new Kawasaki models introduced over the years have helped shape the market, and in the process have created enduring legends based on their unique engineering, power, design and riding pleasure. In the future, Kawasaki Motors, Ltd. is committed to maintaining and furthering these strengths which will surely give birth to new legends.

Kawasaki Motors Corp., U.S.A. markets and distributes Kawasaki motorcycles, ATVs, side x sides, and JET SKI® watercraft through a network of approximately 1,100 independent retailers, with close to an additional 7,700 retailers specializing in general purpose engines. Kawasaki and its affiliates employ nearly 3,100 people in the United States, with approximately 260 of them located at Kawasaki's Foothill Ranch, California headquarters.

Kawasaki's tagline, "Let the Good Times Roll.®", is recognized worldwide. The Kawasaki brand is synonymous with powerful, stylish and category-leading vehicles. Information about Kawasaki's complete line of powersports products and Kawasaki affiliates can be found on the Internet at www.kawasaki.com.
